

ARE YOU ready

FOR YOUR FIRST COLLEGE MATH COURSE?

**Congratulations, you've
been accepted to college!**

Are you wondering if there's
anything you can do to prepare?

We know it's hard to make a start
when you don't know where to begin.

Almost one-third of students are at risk of not passing their math course and many students who do not pass it, do not complete their college education.¹ Passing your first college math course is very important for your college career.

You can do something now to prepare for your first math course. *Stepping It Up: Foundations for Success in Math* is a math program that features an interactive online math tutorial program called MyMathLab. MyMathLab will help you brush up on the math skills that will set you up for success.

MyMathLab tests you on your math skills and gives you a personal plan of the skills you need to work on. It provides help all along the way.

Take your first step to success in college now!

Go to www.pearsoncanada.ca/steppingitup_mymathlabtour

now for a guided tour of Stepping It Up or log into MyMathLab.com to get started.
